EDUCATION

Bachelor of Technology (BTech)

APJ Abdul Kalam Technological University, India, Pathanamthitta

2015 - 2019

Electrical and Electronics (EEE)

SKILLS

- Python
- ROS 2
- GIT
- RobotStudio, TM Flow, RoboDK
- AutoCAD, AutoCAD Electrical
- Fusion 360, Eagle

LANGUAGES

- English
- Malayalam (Native)

HOBBIES

- Swimming
- Video games
- Bike riding
- Traveling

BONNY BABU

ROBOTICS ENGINEER

PROFESSIONAL SUMMARY

Highly motivated and results-oriented Electrical Engineer with 4 years of experience, specializing in ROS development and application. Possess in-depth expertise in ROS 2, including robot programming, simulation, and troubleshooting. Actively contribute to the open-source robotics community through ROS 2 development and knowledge sharing. Additionally, I leverage my electrical engineering background and strong cobot programming skills to successfully implement and simulate collaborative robots like Omron TM5 and ABB Yumi for various applications. I'm always seeking new opportunities to learn, grow, and push the boundaries of ROS development while tackling innovative automation challenges with my combined skillset.

EXPERIENCE

- May 2021 - Now

Robotics engineer

Simelabs - Digital, AI, Metaverse, Robotics, VLSI / India, Ernakulam

Plant automation (Client)

- Worked closely with clients to understand their automation requirements and developed simulation-based solutions.
- RoboDK and RobotStudio simulations for offline programming and virtual commissioning.
- Designed and implemented automation solutions using Omron TM5 Cobots and ABB Yumi Cobots.

Simeworld (In house project)

- Communication bridge between ROS2 DDS and Websockets for seamless integration with web-based interfaces.
- Collaborated with cross-functional teams to define requirements and specifications for the web-based interface.

- January 2020 - April 2021

MEP Designin engineer

Path BEE Engineers and Contractors / India, Ernakulam

- Create and maintain electrical single-line diagrams (SLDs) and layouts using AutoCAD software.
- Developed accurate electrical plans, layouts, and specifications that adhere to the specific requirements and guidelines of the KSEBL.
- Verify that electrical equipment, wiring, and components are installed according to the approved drawings and applicable standards.
